

Open Science Seminar Series

Start your week **open** to new ideas! Starting Monday March 27th, the Open Science Alliance, an NSF-funded Innovations in Graduate Education program designed to promote open science practices and scholarship amongst graduate students and faculty, will host a series of online seminars about open science. The speakers are all faculty and student recipients of the Open Science Fellowship award. Please join us at the link below each week to learn more about open science and help spread the knowledge throughout academia.
